## SUMMARY

With extensive experience in both Web development and graphic design, I bring a unique blend of technical and creative skills to every project. As a web developer specializing in Laravel, I have a deep understanding of modern web technologies and frameworks, ensuring the creation of robust, scalable, and high-performance web applications. My expertise includes database management, API integration, Middle ware, and custom feature development, all while maintaining clean and efficient code.

## RELEVANT PROJECTS:

### Archex - Architecture & Interior Designing

August, 2024

- Developed a dynamic architecture website using Laravel to showcase architectural services and projects.
- Managed backend development for efficient content and service management.
